

Printable Tape Measure

160 cm / 63 in · 7 segments

1. CHECK CALIBRATION

Both lines must measure exactly 10 cm and 4 in with a real ruler. A credit card (85.6 × 54 mm) must fit the box at right exactly. If not, reprint at 100%.

2. Print at 100% / "Actual size" (turn OFF "Fit to page"). Landscape.
3. Check the calibration above with a ruler or a credit card.
4. Cut out each segment along its outline, keeping the gold glue tabs.
5. Lay segment 2 over tab 1 so its red-arrow edge meets red line 1. Tape. Repeat.
6. Measure snug, not tight: tape flat on skin or base layer, no squeezing.

Credit card: 85.6 × 54 mm
